

Swimming pool coping.

Material to be used and accessories:

- Swimming pool coping (RP-400, 500).
- Smooth swimming pool coping (MPL-330).
- Corner sections for inner and outer angles.
- Shower base (PLAT-80). Indispensable for hygiene.
- Terrazzo (TE-40, TE-50 and TEG-500) for creating paved areas around the pool.
- Round coping (MPL-330R) for making curved pool sections, round pools and for building "Roman baths".

This piece allows us to make circumferences with a diameter of 280 cm. (22 pieces make up a circumference). In any case, different

larger or smaller diameters can be obtained by playing with the joints or by cutting the pieces.

Recommended products:

They are easy and comfortable to install using type B Mortar and COLA-SAS for the joints.

Installation:

- Their size makes them easy and comfortable to install with type B mortar, with no need for skilled labourers, as the piece can easily be cut and adapted to any size on site.
- The pieces are not reinforced, which prevents problems caused by rusting.
